Sandwich, N. H., Feb. 25, 1886.

SCHOOL REPORT.

In accordance with the laws of New Hampshire, we herewith present our report of the Public Schools of Sandwich for the year ending March 1, 1886. A majority of the schools have had teachers of ability and experience. The young teachers have shown energy and self reliance. We feel assured that the schools of the past year will compare favorably with those of preceding years. Tardiness has been on the increase from year to year. Truancy is another evil, the penalty for which should be more rigidly enforced. If scholars were punctual in their attendance and not unnecessarily absent (as we have reason to believe they have been) the results would be far more satisfactory. Parents should be more interested in these matters, for with them rests a large share of the responsibility.

We are about to try a new method of managing the schools, based upon the experience of others who are able to be judges of such matters. It is intended for the better, and in our opinion it should have the assistance and hearty co-operation of every one. The change will not be as great as many expect and no one will be inconvenienced beyond what the general welfare of the schools may require. One of the chief benefits that will arise from the town system will be to prevent the too frequent change of teachers, and at the same time render it possible to select a better grade of teachers than could be selected under the system that has governed in the past.

There have been 243 weeks of school during the year, giving to each district an average of 12.7 weeks. The longest school has been 26 weeks and the shortest 3 weeks. Whole number of scholars attending two weeks or more, 276; average daily attendance, 196. Whole amount of school revenue, \$1421.78.

Respectfully submitted,

GEO. S. HOYT,	} <i>School</i>
